Data Visualization with Power BI and Tableau Practical – VII

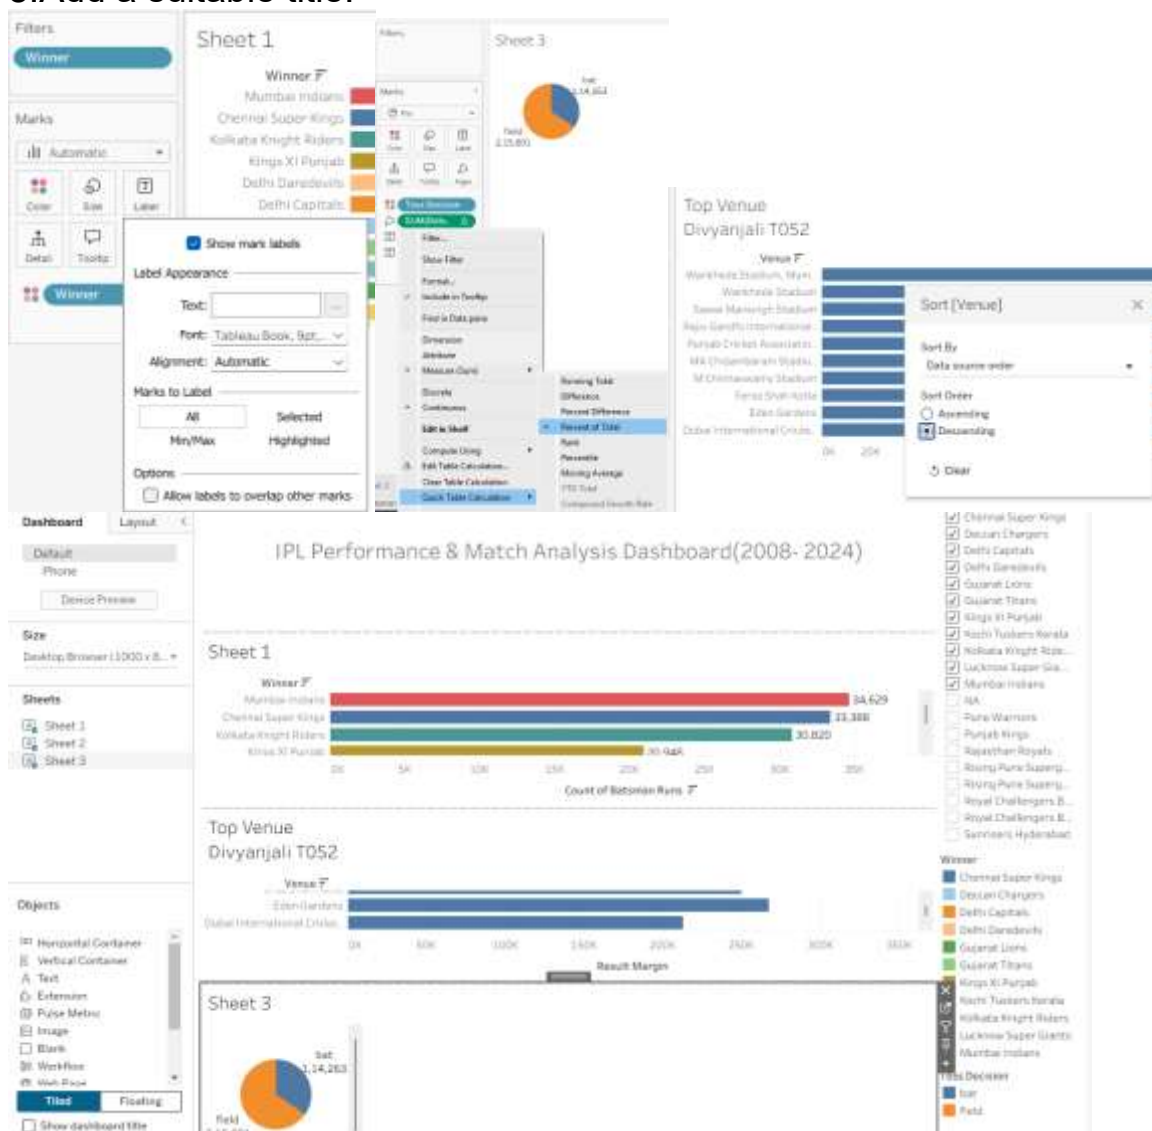

Roll No.: T053	Name :- Nidhi Yadav
Class: TYIT	Batch:01
Date of Assignment: 27-08-2026	Date/Time of Submission:27-08-2026

Practical 7: Creating Interactive Dashboards and Data Stories

A) Design a basic dashboard layout using sheets.

Steps:-

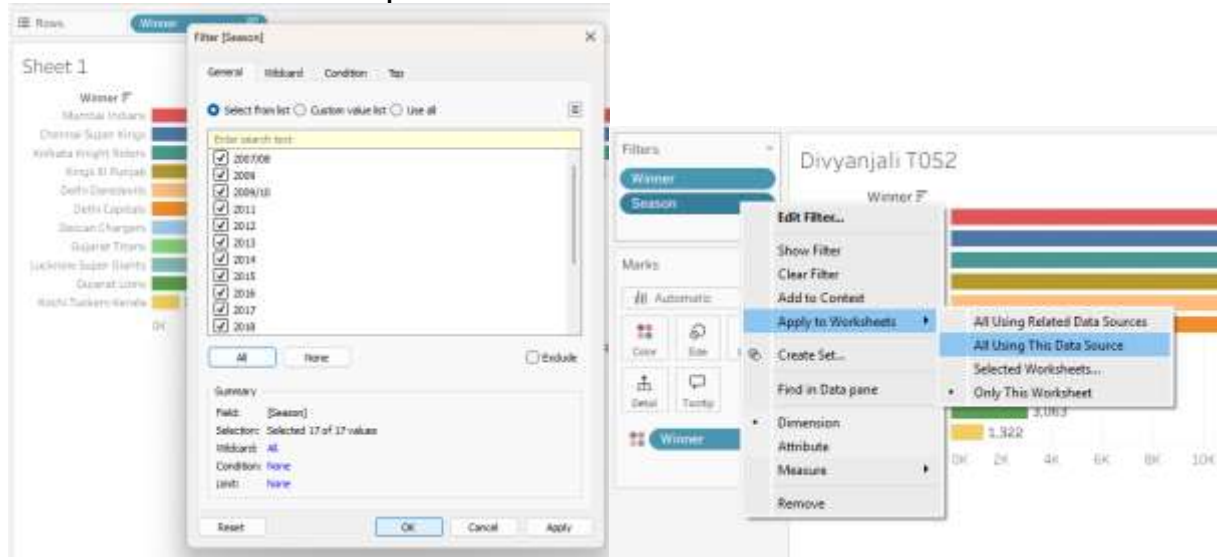

1. Open Tableau.
2. Connect your dataset.
3. Create Sheet 1 and make a chart.
4. Create Sheet 2 and make another chart.
5. Click Dashboard → New Dashboard.
6. Drag the sheets onto the dashboard.
7. Arrange the charts neatly.
8. Add a suitable title.

B) Add filters and interactive controls

Steps:-

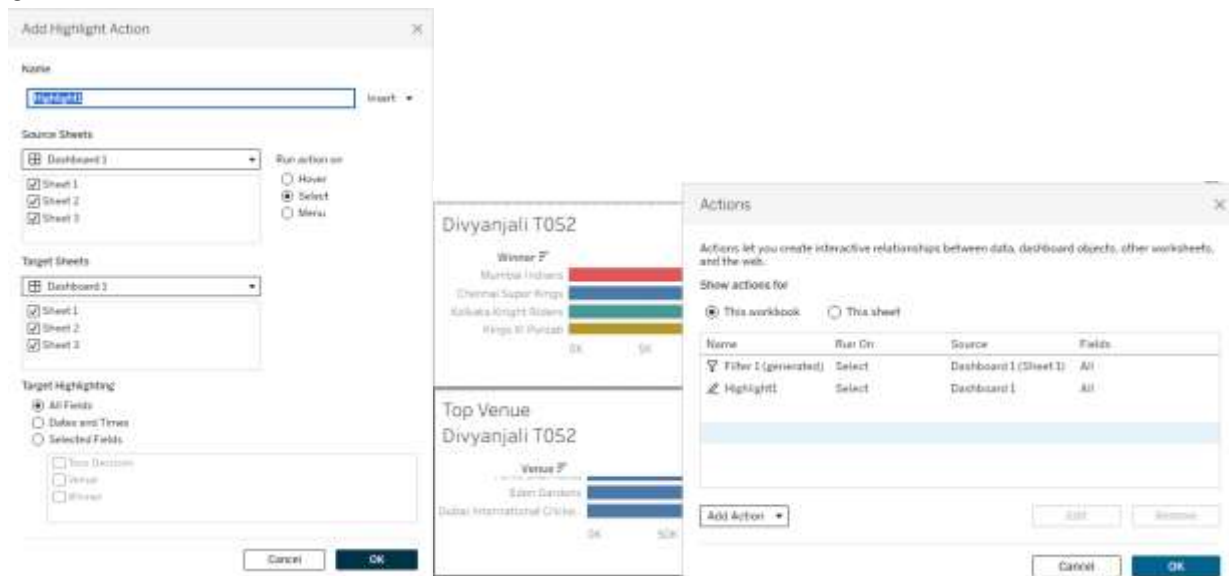

1. Open your dashboard.
2. Select a chart.
3. Click the field you want to filter.
4. Choose Show Filter.
5. Select the required values.
6. The dashboard will update according to the selected filter.
7. Add more filters if required.

c) Implement highlight and filter actions

Steps:-

1. Open the dashboard.
2. Go to Dashboard → Actions.
3. Click Add Action → Highlight.
4. Select the source sheet.
5. Select the target sheet.
- Click OK.
6. Again go to Dashboard → Actions → Add Action → Filter.
7. Select the required source and target sheets.
- Click OK.
8. Click a data value to test the interaction.

D) Use URL and set actions for interactivity

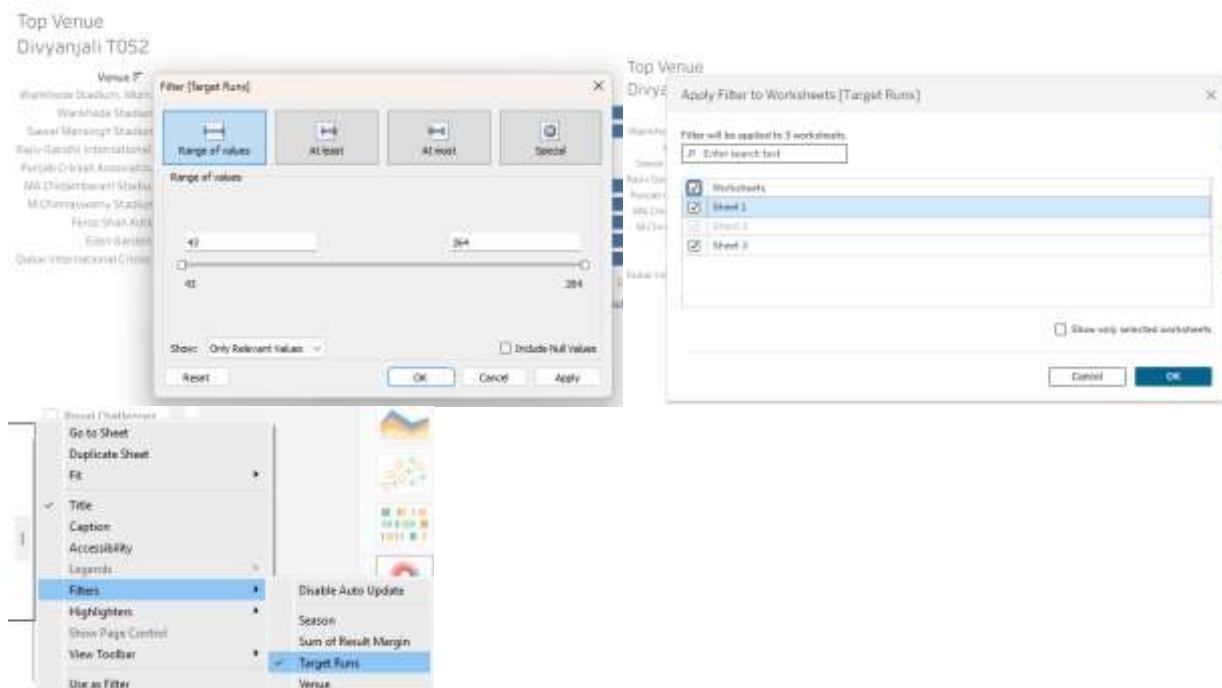

Steps:-

URL Action:

1. Open Dashboard → Actions.
2. Click Add Action → Go to URL.
3. Enter the required website URL.
4. Click OK.
5. Click the related data point to test it.

Set Action:

1. Create a Set from the required field.
2. Open Dashboard → Actions.
3. Click Add Action → Change Set Values.
4. Select the source and target sheets.
5. Click OK.
6. Select a value to see the set change.

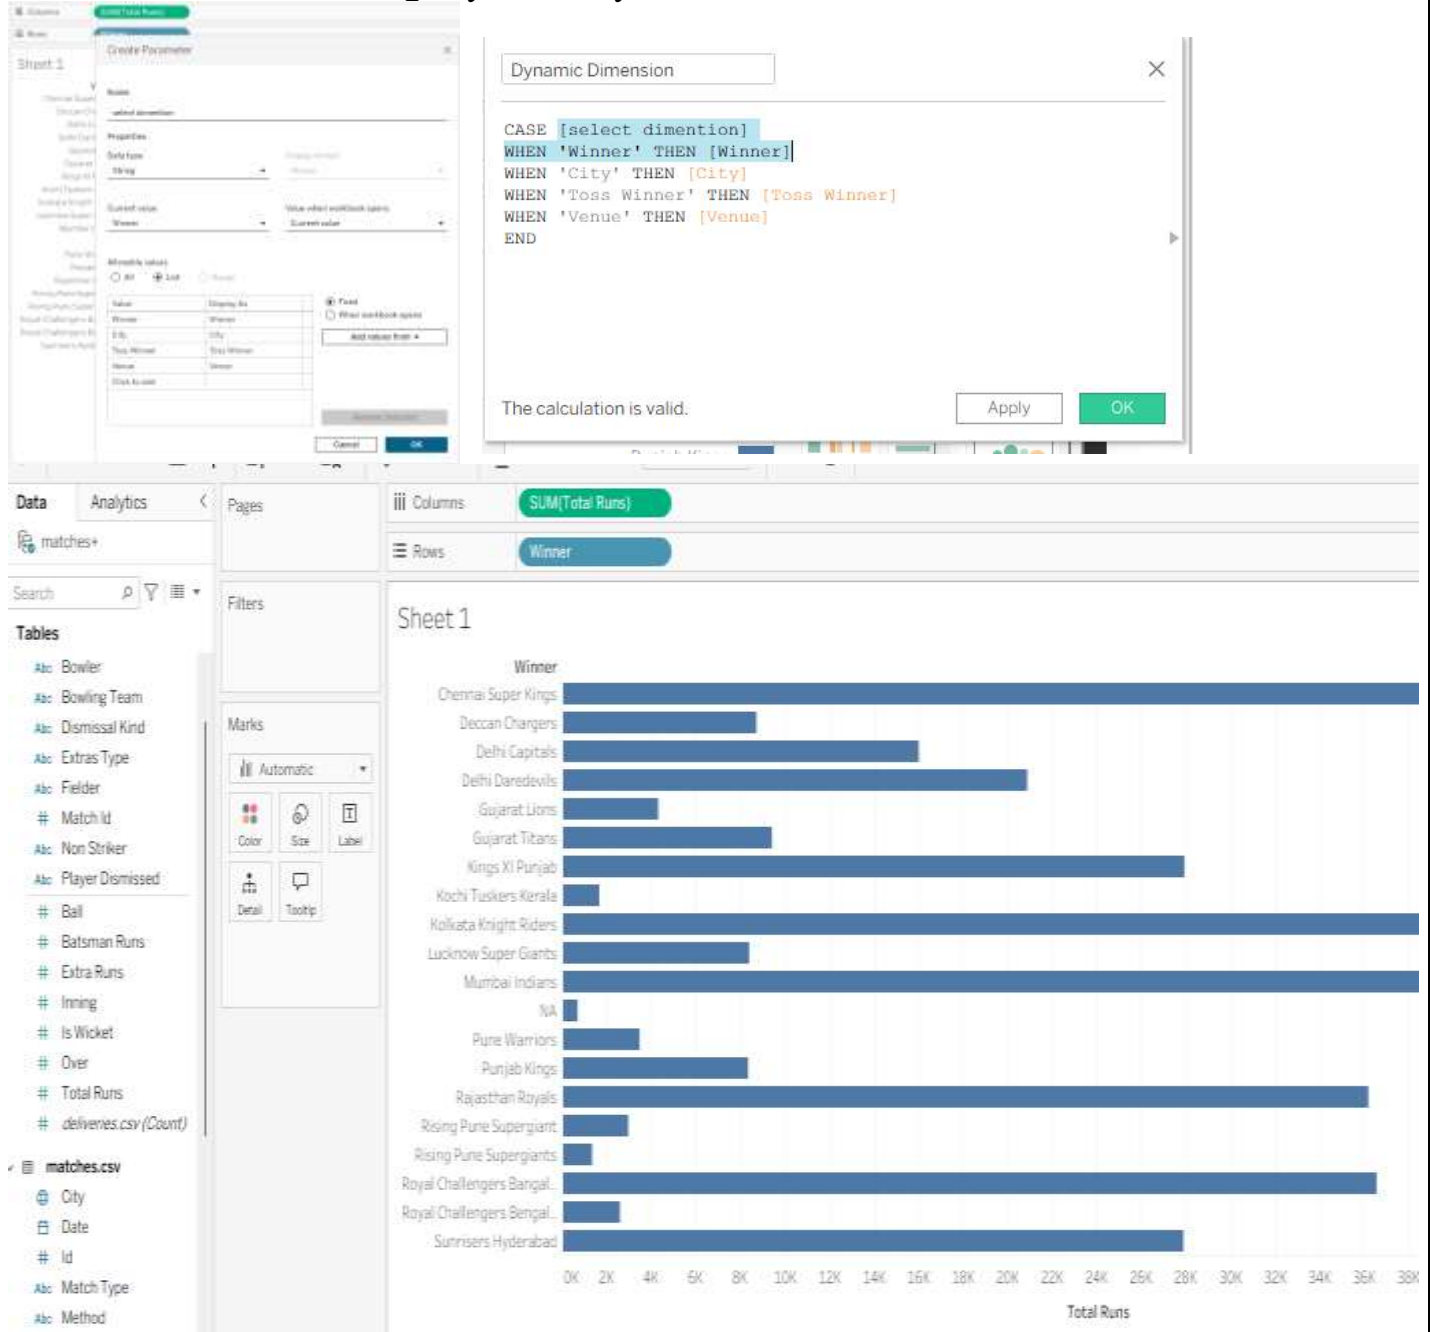

E) Create dynamic dashboards using parameters

Steps:-

1. Create a Parameter.
2. Give it a suitable name.

3. Select the parameter data type.
4. Add the required values.
5. Create a calculated field using the parameter.
6. Add the calculated field to your chart.
7. Right-click the parameter and select Show Parameter.
8. Change the parameter value.
9. The dashboard will change dynamically.

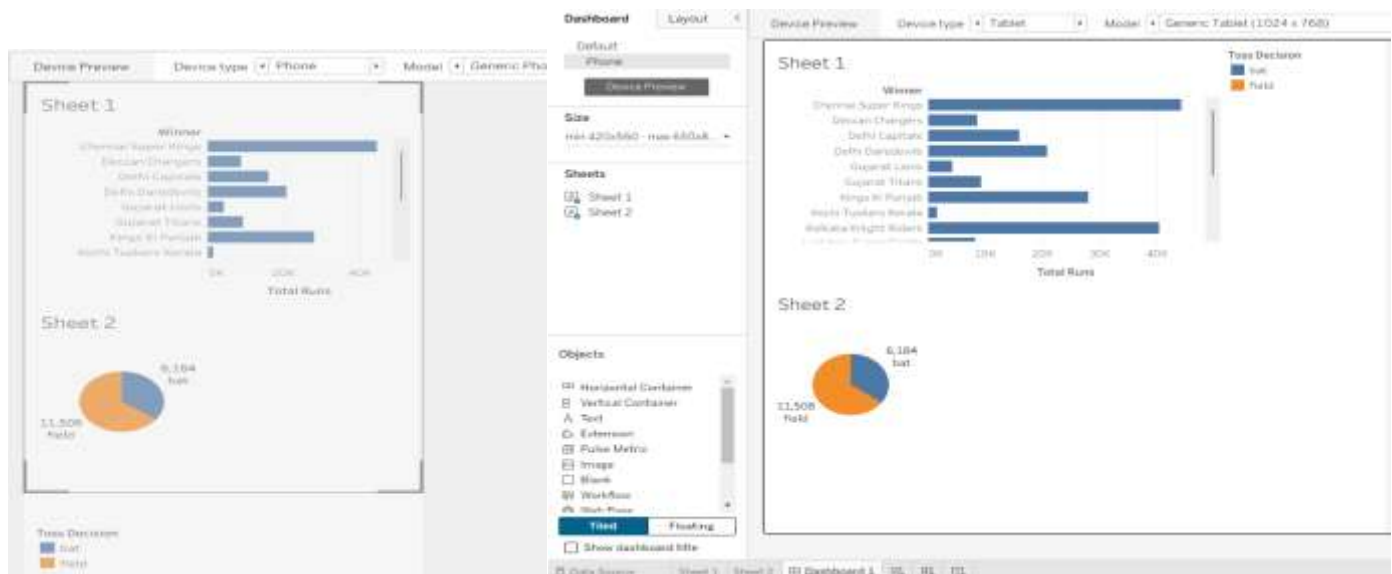

F) Design dashboards for multiple devices

Steps:-

1. Open your dashboard.
2. Go to the **Device Preview** section.
3. Select **Desktop**.
4. Arrange the dashboard.
5. Select **Tablet** and adjust the layout.
6. Select **Phone** and adjust the charts.

7. Check that all charts are visible.

8. Save the dashboard.

G) Build a complete data story using the Story feature.

Steps:-

1. Open **Tableau**, create worksheets, and click **New Story**.
2. Select the **Story Size** and add the first sheet/dashboard with a title.
3. Click **New Story Point** and add the next sheet/dashboard with a short caption.
4. Repeat the same process for all important story points and arrange them in order.
5. Click **Play** to check the story and **save** the workbook
