Data Visualization with Power BI and Tableau

Practical – I

Roll No :- 53	Name :- Nidhi Yadav
Class :- TYIT	Batch :- 2
Date of Assignment :- 24/07/2024	Date/Time of Submission :- 24/07/2026

Part C – Curiosity Question

Curiosity Question

question:

Using a dataset of your choice (CSV format), create an interactive Tableau dashboard that effectively presents key insights from the data.

Requirements:

1. Import your own dataset into Tableau.
2. Identify appropriate **Dimensions** and **Measures**.
3. Create at least **three different visualizations** (e.g., bar chart, line chart, map, pie chart, scatter plot, etc.).
4. Add at least **one filter** or interactive element to the dashboard.
5. Arrange the charts into a **single interactive dashboard** with a clear title.
6. Write **3–5 observations** explaining the insights gained from your dashboard.

Submission:

- Tableau Workbook (.twb or .twbx)
- Dataset (.csv)
- Screenshot of the completed dashboard

A short report containing the observations

Getting Started with Tableau and Building Basic Visualizations

a) Connect to a CSV dataset and explore the Tableau interface

b) Convert fields between discrete and continuous and observe changes

d) Create and customize a basic bar chart

e) Build a line chart for time-series analysis

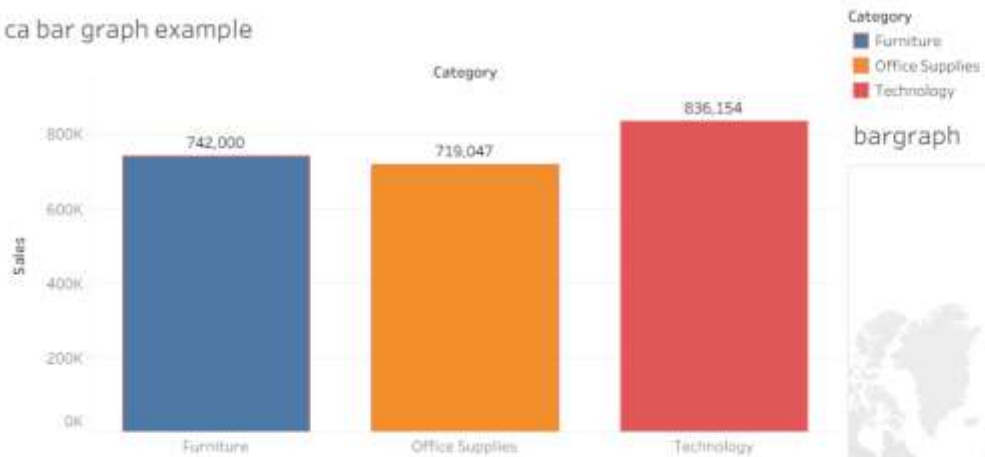

f) Create a geographic map visualization

g) Combine multiple charts into a simple interactive dashboard

ca bar graph example

bargraph

sal trend eexample

1 The Technology category has the highest sales, while Office Supplies has the lowest sales.

The Furniture category also has good sales, but they are slightly lower than the Technology category.

3 The sales keep increasing from 2014 to 2018, which shows that the business is growing steadily.

4 The highest sales were recorded in 2018, making it the best-performing year in the dashboard.

5 Using the bar chart, line chart, and map in one dashboard makes the data easier to understand and compare.
